GENERAL INFORMATION

The main topics of the 18th Waste Recycling Conference include:

- Critical raw materials from secondary sources.
- Recycling and utilisation of industrial wastes (metallurgical, power-engineering, mechanical engineering, chemical industrial, WEEE, end-of-life vehicles, plastics, demolishing waste, mining waste and tailings, etc.).
- Recycling of bio waste (agricultural, forest, food-processing and municipal waste).
- Decontamination and remediation of contaminated areas.
- Business activities in waste recycling.
- Legislation issues of recycling and waste utilization.

Conference language is **English, thus all papers, presentations and communication are required in English**. All accepted papers will be published in the conference proceedings distributed among the participants. Some papers selected by the scientific committee will be offered for journal publication.

The space for advertising of companies active in waste recycling will be provided in the proceedings supplement.
